12. Riots in Paris against the Government. Paris becomes neutral, the Government returns 500 assignats and Government Fame -1. The Commune raises.

Translation Notes

In Legislative / Economy / 4. : the original document lacked "become neutral" to Bordeaux.

In Legislative / Paris Commune / 3. : the original document stated "If "no" : Commune Track -2" but it makes no sense for the Commune to be sated by the refusal of its proposal. The fourth and tenth events' organization was taken as reference for my modification.

In Terror / Counter-revolution / 5. : changed "Same than 2." to "Same than 4.", the original effect seemed to be a misprint in comparison to the other effects in the same place.

It is my understanding that some events' effects, written after ":" are to be considered permanent until used or until its condition is met or changed, as in First One and Indivisible Republic / Politics / 7. 9. 12. or in the same regime / Counter-revolution / 8. or again same regime / Paris Commune / 10. , and thus have have no effect if rolled again while active.
